### OVERVIEW

Sam offers comprehensive legal services to developers and investors in the renewable energy sector.

Sam's experience spans the entire lifecycle of renewable energy projects, including wind, solar, and battery storage. His practice includes conducting due diligence reviews; negotiating and drafting purchase and sale agreements, leases, easements, and option agreements; and performing title and survey reviews.

After beginning his career in traditional commercial real estate, Sam gained extensive experience in real property transactions and regulatory compliance. Over time, his focus shifted towards renewable energy development, driven by a commitment to support sustainable development and contribute to the advancement of clean energy solutions. Sam finds it deeply rewarding to combine his real estate knowledge with his dedication to environmental stewardship to make a meaningful impact in the renewable energy industry.

Sam's background in both the traditional real estate and renewable energy sectors enables him to navigate related complex legal challenges effectively, ensuring that clients receive the highest level of service and support. Clients appreciate Sam's transparency, communication skills, and dedication to providing practical, actionable solutions. Sam's goal is to ensure that every aspect of a project is meticulously handled to support short and long-term success.

### Industry

Energy & Natural Resources
