

## ENERGY & NATURAL RESOURCES

Across the country and around the world, Husch Blackwell clients are blazing new trails in energy production and sustainability – and we’re right there with them. As the global spotlight focuses on renewable and alternative energy technology, we draw on our long history across energy sectors to help developers, investors, owners, and lenders forge the future.

Our Energy & Natural Resources law team includes more than 70 attorneys who devote their practice to guiding multinational energy companies through the complex business and regulatory issues facing today’s energy companies.

### Our guidance to clients in the energy and natural resources sector includes:

Facility development and construction

Mergers and acquisitions

Project finance

Power markets

Permitting and regulation

Safety and health

### Strategic Transactions

Since 2010, we’ve led our clients through energy mergers and acquisitions worth more than \$22 billion. Although we have a keen focus on renewable power generation deals, our experience spans the energy industry. Our mergers and acquisitions work also includes utilities, oil and gas companies, transmission companies and fossil fuel

*The commercial viability of our biofuel refining technology is made possible through international collaboration among world-class organizations. Husch Blackwell helped facilitate these relationships and the financing necessary to move our projects forward.*

— Robert  
Tripp, CEO,  
Benefuel Inc.
